# Set Your Sights On Precision and Accuracy with Dave White's SitePro

Thank you for your purchase of our product. The purpose of this user's guide is to acquaint you with your instrument, its components, safety, proper care, and handling.

We would appreciate your feedback on this product or any other product comments or suggestions. Please send to **info@dwsitepro.com**

RD 105 DETECTOR

The detector aids in locating and targeting a visible or invisible beam emitted by a rotary laser instrument; perfect for use in outdoor conditions, where sunlight and distance may make locating the beam more difficult.

The laser detector includes a rod clamp which allows to mount the detector onto square, round or oval sighting rods.

The numbering of the product features shown refers to the illustration of the tool above.

1. LCD Display
2. Magnetic mounts
3. Reception area for the laser beam
4. On Center LED
5. Center mark
6. Audio signal button
7. On/Off switch
8. Speaker
9. Button for adjustment of measuring accuracy
10. Mounting Bracket
11. Locking screw for leveling rod

*This laser instrument may be sold with different model/type of receiver.

RD 105 PREPARATIONS

Inserting/Replacing the Battery

4 AA alkaline batteries are recommended for the tool.

When the batteries are low, the battery low indicator will display.

Pull the latch of battery lid outward and open the battery lid.

Remove the battery when not using it for extended periods. When storing for extended periods, the battery can corrode and discharge.
